

## **Join Our Lab – Postdoctoral Positions Available**

We are looking for creative, curious, and driven postdoctoral researchers to join our team and explore fundamental questions in stem cell and cancer biology.

Our research combines *in vivo* models, advanced imaging, and multi-omics approaches to understand how tissues maintain integrity and suppress tumor development.

We are particularly excited to hear from candidates with experience in:

- *In vivo* experimental system
- 2D and 3D epithelial cell culture models

A strong publication record, including at least one first-author paper, is highly desirable and will support applications for competitive postdoctoral fellowships.

### **How to Apply**

Please send:

- Your CV
- A short summary of your research achievements
- A brief statement outlining your motivation and how you would contribute to the lab

Applications should be sent to [sara.gallini@epfl.ch](mailto:sara.gallini@epfl.ch)
